PROFILE

I am a third-year (T.E.) Electronics and Telecommunication Engineering student with a strong interest in software development and web technologies. I am a quick learner, passionate about technology and problem-solving, and eager to gain practical industry experience through internships and project-based opportunities.

EDUCATION

Bachelor of Engineering, MMCOE, Pune (SPPU)

Electronics and Telecommunication

2023–2027 | CGPA: 8.55

Nagpur University | Amravati University

SSC – 62% | HSC – 92%

INTERNSHIP EXPERIENCE

Web Development Intern

Arnita Infotech | Jan 2026 – Feb 2026

- Developed a responsive website for a multi-specialty hospital to improve online presence and patient accessibility.
- Designed and implemented key pages such as Home, Services, Doctor Profiles, and Contact.
- Used technologies like HTML, CSS, and JavaScript.
- Improved user experience by creating a clean and easy-to-navigate interface.
- Ensured mobile compatibility and optimized website performance.

WORK EXPERIENCE

BETA MMCOE, Pune

Vice President – Newsletter

Volunteered with BETA in organizing the annual technical and non-technical event "Dexterity" in 2024 and 2025, contributing to event planning and coordination. Organized a debate competition titled "Quantum Quibble," managing participants and ensuring smooth execution. Also participated in a social outreach activity for school students and assisted in organizing a Toykathon event, supporting overall planning and coordination.

PROJECTS

Smart Energy Monitoring System

Developed an IoT-based Smart Energy Monitoring System using Espressif Systems ESP32, ACS712 current sensor, ZMPT101B voltage sensor, and level shifter to monitor real-time electrical parameters such as voltage, current, power, energy consumption, and power factor. Designed and developed a responsive web dashboard using HTML, CSS, JavaScript, and Chart.js for live data visualization and monitoring. Built the backend using Node.js and Express.js to handle real-time sensor data communication between hardware and the web dashboard, enabling continuous monitoring and analysis of energy usage.

Smart Healthcare System

- Developed an integrated healthcare system combining a medicine reminder and weather monitoring system.
- Used ESP32, sensors, buzzer, and RTC module for real-time monitoring and alerts.
- Designed to assist elderly users with medication reminders and environmental awareness.

TECHNICAL SKILLS

- Programming Languages: C, C++, Java, Python

- Web Development: HTML, CSS, JavaScript
- Databases: MySQL
- Version Control: Git, GitHub
- Tools & Platforms: Arduino IDE, VS Code
- Core Concepts: Data Structures (Basic), Embedded Systems, IoT Fundamentals
