PROFESSIONAL SUMMARY

Motivated Electronics & Telecommunication Engineering student (CGPA 8.55) with hands-on experience in full-stack web development, IoT system design, and embedded systems. Proficient in building responsive web applications with Node.js/Express.js backends, real-time data pipelines, and REST API integration. Adept at Java, Python, and JavaScript with a strong foundation in OOP, Data Structures, and DBMS. Seeking internship or fresher roles in Software Development, Full Stack Development, or IoT Engineering.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

Frontend: HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, Chart.js

Backend: Node.js, Express.js, REST APIs

Database: MySQL, DBMS

Tools & Platforms: Git, GitHub, VS Code, Arduino IDE

Hardware / IoT: ESP32 (Espressif), ACS712, ZMPT101B, RTC Module, Embedded C

Core Concepts: OOP, Data Structures & Algorithms, IoT Fundamentals, Embedded Systems, DBMS

EDUCATION

Bachelor of Engineering – Electronics & Telecommunication Engineering

2023 – 2027

MMCOE, Pune | Savitribai Phule Pune University (SPPU)

CGPA: 8.55

HSC – 92% | Amravati University

2023

SSC – 62% | Nagpur University

2021

INTERNSHIP EXPERIENCE

Web Development Intern – Arnita Infotech

Jan 2026 – Feb 2026

Tech Stack: HTML5, CSS3, JavaScript, Responsive Web Design

- Engineered a fully responsive multi-specialty hospital website using HTML5, CSS3, and vanilla JavaScript, improving patient accessibility and institutional online presence.
- Architected and implemented modular page components — Home, Services, Doctor Profiles, and Contact — following a component-driven design approach.
- Optimised frontend performance and cross-device compatibility, achieving consistent rendering across mobile, tablet, and desktop viewports.
- Enhanced navigation flow and UI/UX design principles, reducing user drop-off through intuitive layout structure and accessibility improvements.

PROJECTS

Smart Energy Monitoring System

IoT | Full Stack | Embedded Systems

Tech Stack: ESP32, ACS712, ZMPT101B, Node.js, Express.js, HTML5, CSS3, JavaScript, Chart.js

- Architected an end-to-end IoT pipeline using ESP32 microcontroller integrated with ACS712 current sensor and ZMPT101B voltage sensor to capture real-time electrical parameters including voltage, current, power, energy consumption, and power factor.
- Developed a RESTful backend API using Node.js and Express.js to handle bidirectional sensor data communication between hardware and a web dashboard with continuous polling and data persistence.
- Built an interactive, fully responsive analytics dashboard with HTML5, CSS3, JavaScript, and Chart.js, enabling live chart rendering and time-series visualization of multi-parameter electrical data.
- Implemented robust level-shifting circuitry for signal integrity between 5V sensors and 3.3V ESP32 logic, ensuring accurate analog-to-digital conversion.

Smart Healthcare System

IoT | Embedded Systems

Tech Stack: ESP32, RTC Module, Environmental Sensors, Buzzer, Embedded C

- Developed an ESP32-based intelligent healthcare system integrating a medicine reminder module with weather and environmental monitoring for elderly-assistive applications.
- Implemented real-time alert notifications using a buzzer and DS3231 RTC module to trigger time-based medicine reminders with reliable clock accuracy (± 2 ppm drift).
- Designed sensor fusion logic to correlate environmental parameters (temperature, humidity) and deliver contextual health alerts, improving medication adherence and environmental awareness.

Personal Portfolio Website

Frontend | UI/UX

Tech Stack: HTML5, CSS3, JavaScript | [Live Demo](#)

- Designed and deployed a fully responsive personal portfolio website showcasing projects, technical skills, and achievements, deployed via GitHub Pages.
- Applied modern UI/UX design principles — CSS Flexbox/Grid, smooth scroll animations, and semantic HTML — for optimal readability and professional branding.
- Integrated project showcase sections with live GitHub links, enabling recruiters to directly access work samples and repositories.

LEADERSHIP & ACTIVITIES

Vice President – Newsletter | BETA MMCOE, Pune

2024 – 2025

- Spearheaded newsletter operations and coordinated Dexterity 2024 & 2025, an annual flagship technical and non-technical festival, managing end-to-end event planning and stakeholder communication.
- Organised and moderated 'Quantum Quibble', a structured debate competition, overseeing participant management, scheduling, and smooth execution.
- Contributed to social outreach initiatives for school students and co-ordinated a Toykathon event, demonstrating leadership and community engagement.
